

## Smart Water Networks

Crowder Consulting provide innovative solutions to support the management of water networks. We serve major water operators worldwide, helping them to reduce water losses and supporting their journey towards Smart Networks.

Our collective knowledge and experience of all aspects of water network management has enabled us to become a leader in this field.

NETBASE is our flagship product that acts as a Digital Twin of a water operator's network; providing source to tap insights.

Our suite of best-practice applications and digital services provides utility practitioners with the tools and analyses to reduce water losses and manage their network more efficiently.

## Clients

## Crowder Consulting
